OPEYEMI ABRAHAM SHABI

Address: Abuja, Nigeria

Email: abrahamshabi2@gmail.com

Phone: (+234)7087855946

GitHub: https://github.com/Bigcheese-2

Portfolio: https://yemishabi.vercel.app

SKILLS

Languages: JavaScript (ES6+), TypeScript,

Technology: AI, Prompt Engineering, Context Engineering

Libraries and Frameworks: React, Next.js

Styling: Tailwind CSS, Styled Components, CSS3, Bootstrap, Material UI

Tools: Git, GitHub, WordPress, Shopify, Figma, Webflow, Vercel, VS Code, , Elementor.

Others: Jest, REST APIs, Tanstack Query (React).

EDUCATION

The Federal University of Technology, Minna — Minna, Nigeria

Bachelor of Technology — December 2015 – December 2021.

EXPERIENCE

Pullus Africa — Nigeria, Remote

Software Engineer (Front-End) — February 2026 – Present

Skills: Next.JS, React Query, TypeScript, WordPress,

- Contributed to a production application serving 5,000+ users across poultry farming operations in Africa.
- Collaborated with a team of engineers to build offline-first features, enabling users in low-connectivity areas to use the app without internet access.
- Managed data-heavy screens like batch management and cluster analytics using TanStack Query and TanStack Table.
- Developed and optimized frontend interfaces using modern frameworks and best practices, focusing on scalability, usability, and responsive design.

Rishi Security — United States, Remote

Front-End Software Engineer — August 2025 – January 2026

Skills: AI, React.JS, React Query, TypeScript, Context Engineering, OSINT

- Collaborated to the design and development of an OSINT intelligence platform that automates data collection, analysis, and visualization for cybersecurity and intelligence operations.
- Applied prompt and context engineering techniques to improve data extraction accuracy and streamline investigative workflows.

- Integrated multiple RESTful APIs to unify open-source intelligence feeds, enhancing performance and real-time insights.
- Developed and optimized frontend interfaces using modern frameworks and best practices, focusing on scalability, usability, and responsive design.

Bloom and Branch Agency — Canada, Remote

Front-End Web Developer — February 2020 - Present

Skills: AI, React.JS, React Query, Next.JS, TypeScript, WordPress, Elementor, Figma,

- Led the front-end development of multiple projects, designing and developing over 15+ custom WordPress themes and plugins tailored to client and internal requirements.
- Optimized front-end performance, reducing load times by up to 40% through efficient code refactoring, caching strategies, and image optimization.
- Collaborated with UI/UX designers and project teams to translate creative concepts into high-performance interfaces, enhancing engagement and user retention.
- Delivered post-launch support and continuous updates, improving usability and stability, reducing maintenance issues by 30%, and achieving a 95% client satisfaction rate across multiple projects.

Curntly LLC — United States, Remote

Software developer [contract] — April 2025 – September 2025

Skills: React, JavaScript, BootStrap, Supabase, Replit.

- Adapted to an existing code-base, refactoring components and cleaning up logic to improve maintainability and overall application performance.
- Redesigned the front-end interface of the project, focusing on usability, accessibility, and modern design practices.

- Optimized frontend workflows to ensure smoother state management, faster load times, and a more consistent user experience.

The Connect Afrika — Nigeria, Remote

Lead Front-End Developer — October 2021 - Present

Tech stack: Next.js, TypeScript, Framer, Tailwind, GitHub.

- Led the development of interactive web applications using Next.js and TypeScript, ensuring optimal performance and maintainability.
- Partnered with UI/UX designers and back-end teams to implement pixel-perfect interfaces, seamless API integration, and user features.
- Directed a team of developers, establishing coding standards, conducting code reviews, and mentoring junior engineers to enhance their skills and productivity.
- Worked closely with the team to ensure the new version of the app met user needs and expectations, leading to improved user satisfaction and retention.
